

AMENDMENTS TO THE SPECIFICATION

Applicants have herewith submitted a Substitute Specification intended to replace the originally filed specification and a separate redline version showing the changes.

It is respectfully submitted that the Substitute Specification includes no new matter and that it includes the same changes as are indicated in the attached marked-up copy of a translation of the original specification.

Please replace the Abstract as filed and insert the following new Abstract:

ABSTRACT OF THE DISCLOSURE

The present invention relates to a refrigerator including a main body formed with a storage compartment, a door hingedly connected to the main body; and at least one shelf provided inside the storage compartment, the shelf comprising: a glass on which foodstuffs are laid; a glass supporter coupled to edges of the glass; a pair of supporting brackets provided in opposite sides of the glass supporter and supported onto a wall of the storage compartment; and a coupler coupling the glass supporter with the supporting bracket.
